

HQSYN16 - Task #3746

Task # 3669 (New): RA1a - Analysis and cataloguing of artifacts

Task # 3714 (Closed): WebProkus - software for analysis of synthetic speech

Enable to mark artefacts in WebProkus

19.02.2016 12:27 - Matoušek Jindřich

Status:	Closed	Start date:	19.02.2016
Priority:	Normal	Due date:	04.03.2016
Assignee:	Matoušek Jindřich	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	RA1: Analysis of artifacts in synthetic speech		
Description			
Typical usage:			
<ol style="list-style-type: none">1. Use WebProkus to synthesize a sentence2. Mark segment(s) in which an artefact occurs - i.e. two neighboring diphones with an artefact at the concatenation point or a sequence of more diphones (forming a syllable, word, phrase or even the whole sentence)3. Click on "BAD" button to store the artefact4. Write a comment with the description of what is wrong5. In addition, select another alternative candidate and repeat the steps above. If the artefact is longer present, click on "OK" button to obtain a good example

Done.

You can mark artefact in prokus (m key). You can set score (-1 bad, +1 good) and comment.

You can view stored artefacts from homepage (new item in menu)
