| Target version: | RA3: Phonetically justified parameters for speech synthesis | | |

Description

Introduce a special prosodeme for utterance-leading prosodic word (similarly as it is done for utterance-trailing prosodic word).

Probably also include the 1st prosodic word after a pause.

Compare it with the baseline system and evaluate.

History

#1 - 25.09.2017 10:06 - Tihelka Dan

- Follows Task #4252: Analyze F0 differences in first two syllables of non-final prosodic words added

#2 - 25.09.2017 10:07 - Tihelka Dan

- Follows deleted (Task #4252: Analyze F0 differences in first two syllables of non-final prosodic words)

#3 - 10.12.2018 12:21 - Tihelka Dan

- Status changed from New to Resolved

- Assignee changed from Tihelka Dan to Jůzová Markéta

There are experiments with a special variant of 0-th prosodeme, described in paper [On the Extension of the Formal Prosody Model for TTS](#)

#4 - 10.12.2018 12:21 - Tihelka Dan

- Status changed from Resolved to Closed
